

SRINITHIYA M

Thanjavur, Tamil Nadu, India | +91-9342700944 | srinithiyaofficial@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

DevOps and Site Reliability Engineer with hands-on experience designing and deploying cloud-native infrastructure on AWS. Proven ability to build scalable Kubernetes clusters on EKS, automate CI/CD pipelines with Jenkins and GitHub Actions, and implement real-time monitoring using Prometheus and Grafana. Proficient in Terraform, Ansible, Docker, and Python. Passionate about reducing operational overhead, improving deployment reliability, and building infrastructure that scales.

TECHNICAL SKILLS

Programming Languages

Python, Shell Scripting (Bash), SQL

Cloud Platforms

AWS (EC2, S3, IAM, EKS, VPC, CloudWatch), Microsoft Azure (Fundamentals)

DevOps & CI/CD Tools

Docker, Kubernetes (EKS, Minikube), Jenkins, GitHub Actions, Helm, Puppet, Ansible

Infrastructure as Code

Terraform, Ansible

Monitoring & Observability

Prometheus, Grafana, AWS CloudWatch

Databases

MySQL, PostgreSQL

Version Control & Registries

Git, GitHub, DockerHub

Operating Systems

Linux (Ubuntu, Fedora), Windows

Networking

TCP/IP, DNS, HTTP/HTTPS, Load Balancing

SOFT SKILLS

Communication | Team Collaboration | Problem Solving | Quick Learner | Adaptability | Troubleshooting | Attention to Detail | Time Management

PROJECTS

URL Shortener – Kubernetes DevOps Automation & Monitoring System

2026

Tech: Python (Flask), Docker, Kubernetes (AWS EKS), Jenkins, Prometheus, Grafana, DockerHub, PostgreSQL

- Deployed a production-grade URL Shortener on AWS EKS using Kubernetes, handling auto-scaling and zero-downtime deployments.
- Architected end-to-end CI/CD pipeline with Jenkins, automating Docker image builds, DockerHub pushes, and EKS deployments on every code commit.
- Configured Prometheus scrape targets and Grafana dashboards for real-time application metrics, reducing incident detection time by 30%.
- Exposed the application via Kubernetes LoadBalancer service integrated with AWS networking for reliable external traffic routing.
- Containerized the Flask application with optimized Docker images, cutting deployment size and improving startup performance.

Automated CI/CD Pipeline for To-Do Web Application

2026

Tech: Jenkins, Docker, AWS EC2, DockerHub, Flask

- Built a fully automated CI/CD pipeline using Jenkins that reduced deployment time from 2 hours to 10 minutes — an 83% improvement.
- Containerized a Flask web application using Docker and deployed on AWS EC2, ensuring consistent environments across dev and production.
- Configured GitHub webhooks to automatically initiate builds and deployments on every code push, eliminating manual intervention.
- Managed versioned Docker images on DockerHub, enabling easy rollbacks and consistent artifact management.

CloudOptima – Multi-Cloud Cost Monitoring Web Application

2025

Tech: Python, Flask, PostgreSQL, AWS (boto3), Brevo API, Render, Vercel

- Engineered a multi-cloud cost monitoring platform using AWS boto3, reducing manual cost tracking effort by 40%.
- Built a Flask REST API backend with PostgreSQL to store cloud resource data and expose endpoints for idle resource detection.
- Integrated Brevo API for automated contact management and bulk email alerting on cost threshold breaches.
- Deployed frontend on Vercel and backend on Render with CI/CD integration for automated release pipelines.
- Implemented structured logging and automated test suites to improve application reliability and accelerate debugging.

EDUCATION

Master of Science – Computer Science

2024 – 2026

Bishop Heber College, Tiruchirappalli, Tamil Nadu | Percentage: 76.50%

Bachelor of Science – Computer Science

2021 – 2024

PRIEST University, Thanjavur, Tamil Nadu | Percentage: 76.10%

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Jenkins for Beginners – SimpliLearn (2025)
- Python Programming – Scaler (2025)
- Linux Fundamentals – Alison (2025)
- Docker for Developers – Le Wagon (2025)
