| Tamil Nadu (Open to Relocate)

PROFESSIONAL SUMMARY

M.Sc. Computer Science graduate (2026) with hands-on AWS, Linux, Docker, Kubernetes, CI/CD, and Terraform experience across an AWS Cloud internship and three end-to-end DevOps/SRE projects spanning EKS, Jenkins, Redis Streams, and full-stack observability. Seeking an entry-level DevOps Engineer role to contribute to cloud infrastructure, automation, and CI/CD delivery.

EXPERIENCE

AWS Cloud Intern – Davine Technologies

Jul 2026 – Present

- **Infrastructure Provisioning:** Architected and deployed secure AWS environments – EC2, VPC, IAM, ALB, and Auto Scaling – under mentor guidance.
- **Network Architecture:** Designed multi-tier VPC networks with public/private subnets, NAT/Internet Gateways, VPN connections, and Security Groups for production-style isolation.
- **Storage Management:** Managed S3, EBS, EFS, RDS, and DynamoDB storage layers, including backup, snapshot, and bucket-policy configuration.
- **High Availability:** Built high-availability infrastructure with ALB, Target Groups, Auto Scaling Groups, and Multi-AZ failover.
- **CI/CD & Containers:** Worked with AWS ECR for container image storage and explored CodePipeline/CodeBuild for automated build and deployment workflows.

TECHNICAL SKILLS

Programming:	Python, Bash/Shell Scripting, SQL
Cloud-Native:	Docker, Docker Compose, Kubernetes (basic)
CI/CD & Automation:	Jenkins, GitHub Actions, Terraform, Ansible
Monitoring:	Prometheus, Grafana, Amazon CloudWatch
Cloud Platforms:	AWS (EC2, VPC, S3, RDS, DynamoDB, IAM, ALB, Auto Scaling, Lambda, ECR, CodePipeline, CodeBuild, Security Groups, NACL, VPN)
APIs & Backend:	REST API design (Flask, FastAPI)
Databases:	PostgreSQL, MySQL, Redis, DynamoDB
Version Control & Networking:	Git, GitHub, Linux, TCP/IP, DNS, Load Balancing

PROJECTS

URL Shortener – Kubernetes DevOps Automation & Monitoring

2026

Independent project built to practice end-to-end CI/CD pipeline design and Kubernetes deployment on AWS EKS.

Tech: Python (Flask), Docker, Kubernetes (AWS EKS), Jenkins, Prometheus, Grafana

- Engineered an end-to-end Jenkins CI/CD pipeline – GitHub to DockerHub to AWS EKS – for fully automated deployment.
- Built Prometheus/Grafana observability dashboards to monitor live application and infrastructure health.

SRE Incident Management System

2026

Independent project built to practice production-style, high-throughput incident-response and observability workflows.

Tech: FastAPI, Redis Streams, MongoDB, Docker Compose, Prometheus, Grafana

- Architected an async, high-throughput incident platform on FastAPI and Redis Streams with rate limiting and signal debouncing.
- Containerized 6 microservices with automated MTTR tracking across a full OPEN → INVESTIGATING → RESOLVED → CLOSED lifecycle.

CloudOptima – Multi-Cloud Cost Monitoring Platform

2026

Final-year college project built to practice cloud resource auditing and automated cost-alerting workflows.

Tech: Python, Flask, PostgreSQL, AWS (Boto3 SDK), Brevo API, Render, Vercel

- Built a Flask REST API with PostgreSQL to detect idle cloud resources and centralize multi-cloud cost insights.
- Integrated AWS Boto3 for real-time resource data and automated Brevo API email alerts on cloud-cost thresholds.

EDUCATION

Master of Science – Computer Science

2024 – 2026

Bishop Heber College, Tiruchirappalli, Tamil Nadu | Percentage: 76.50%

Bachelor of Science – Computer Science

2021 – 2024

PRIEST University, Thanjavur, Tamil Nadu | Percentage: 76.10%

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Introduction to Containers, Kubernetes, OpenShift – IBM (2026)
- Jenkins for Beginners – SimpliLearn (2025)
- Python Programming – Scaler (2025)
- Linux Fundamentals – Alison (2025)
- Docker for Developers – Le Wagon (2025)
