PROFESSIONAL SUMMARY

M.Sc. Computer Science graduate (2026) with hands-on experience in AWS cloud infrastructure, Linux administration, CI/CD automation, and system monitoring - built through an AWS Cloud internship and four end-to-end DevOps/SRE projects spanning EKS, Jenkins, Terraform, and full-stack observability with Prometheus and Grafana. Seeking an entry-level DevOps, Cloud, SRE, or Linux/Systems Engineer role.

EXPERIENCE

AWS Cloud Intern – Davine Technologies

Jul 2026 – Present

- Architected and deployed secure AWS environments - EC2, VPC, IAM, ALB, and Auto Scaling - under mentor guidance.
- Administered Linux EC2 instances with Apache/Nginx web servers, SSH access, and custom Bash User Data automation for environment setup.
- Designed multi-tier VPC networks with public/private subnets, NAT/Internet Gateways, and Security Groups for production-style isolation.
- Managed S3, EBS, EFS, RDS, and DynamoDB storage layers, including backup, snapshot, and bucket-policy configuration.
- Built high-availability infrastructure with ALB, Target Groups, Auto Scaling Groups, and Multi-AZ failover.

TECHNICAL SKILLS

- **Programming Languages:** Python, Bash/Shell Scripting, SQL
- **Cloud Platforms:** AWS (EC2, VPC, S3, RDS, DynamoDB, IAM, ALB, Auto Scaling, Route 53, Lambda)
- **Cloud-Native & Containers:** Docker, Docker Compose, Kubernetes (AWS EKS, Minikube)
- **CI/CD & Automation:** Jenkins, GitHub Actions, Terraform, Ansible
- **Monitoring & Observability:** Prometheus, Grafana, Amazon CloudWatch
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Linux & Networking:** Linux Administration, SSH, TCP/IP, DNS, Load Balancing
- **Version Control:** Git, GitHub

PROJECTS

SRE Incident Management System

2026

Tech: FastAPI, Redis Streams, MongoDB, Docker Compose, Prometheus, Grafana

- Architected an async, high-throughput incident platform on FastAPI and Redis Streams with rate limiting and signal debouncing.
- Containerized 6 microservices with automated MTTR tracking across a full OPEN → INVESTIGATING → RESOLVED → CLOSED lifecycle.

URL Shortener - Kubernetes DevOps Automation & Monitoring

2026

Tech: Python (Flask), Docker, Kubernetes (AWS EKS), Jenkins, Prometheus, Grafana

- Deployed a containerized application on AWS EKS with an automated Jenkins pipeline - GitHub to DockerHub to EKS.
- Built Prometheus/Grafana observability dashboards to monitor live application and infrastructure health.

CloudOptima - Multi-Cloud Cost Monitoring Platform

2026

Tech: Python, Flask, PostgreSQL, AWS (Boto3 SDK), Brevo API, Render, Vercel

- Built a Flask REST API with PostgreSQL to detect idle cloud resources and centralize multi-cloud cost insights.
- Integrated AWS Boto3 for real-time resource data and automated Brevo API email alerts on cloud-cost thresholds.

EDUCATION

Master of Science – Computer Science

2024 – 2026

Bishop Heber College, Tiruchirappalli, Tamil Nadu | Percentage: 76.50%

Bachelor of Science – Computer Science

2021 – 2024

PRIST University, Thanjavur, Tamil Nadu | Percentage: 76.10%

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Introduction to Containers, Kubernetes, OpenShift – IBM (2026)
- Jenkins for Beginners – SimpliLearn (2025)
- Python Programming – Scaler (2025)
- Linux Fundamentals – Alison (2025)
- Docker for Developers – Le Wagon (2025)
